The Pioneer DJ site shown above offers FAQs, information on software and various other types of information and services to allow you to use your product in greater comfort.

Firmware Update Guide

Read Before Use <Important>

- Unzip the downloaded update file for updating.
- If Java has not been installed, please download the Java Runtime Environment (JRE) at: <https://java.com> and install it on your computer. If you use the Edge browser in Windows 10, even if “In Windows 10, the Edge browser does not support plug-ins and therefore will not run Java. Switch to a different browser” messages are shown in the download page, click [Agree and Start Free Download] button to go forward with download.
- ASIO driver exclusively for DDJ-RX is required to be installed for Windows PC users.
- If you should have any questions, please contact the Pioneer Customer Support Center.

Reference Information

This updater has been verified to operate on the operating systems below;

- Windows® 7/ Windows® 8/ Windows® 8.1/ Windows® 10
- Mac OS X : 10.8/ 10.9/ 10.10

Updating Procedures

Note: Turn the power off and disconnect all the cables from the unit. And close all applications on your computer before running this updating procedure.

- 1) Connect your computer to DDJ-RX via the USB cable included with the product.
- 2) Turn on the power of DDJ-RX while pressing the [SHIFT] button and the [SYNC] button on the LEFT deck, and ensure the Master Level meter LEDs flash before releasing your finger from the these buttons.

- 3) After waiting for about 10 seconds when the update file for DDJ-RX (DDJ-RX_Vxxx.jar) is activated, the following dialogue is displayed.

- If an error message is displayed, click the [Close] button to close the updater program and then activate the update file again.
- Approximately a few minutes are required for updating.

- 4) When the firmware update process is complete, click the [OK] button.

Note: Please note that if you fail to update, turn on the power of DDJ-RX again and start from Step 2) of the above Updating Procedures.

How to check the Firmware Version

For Windows 7

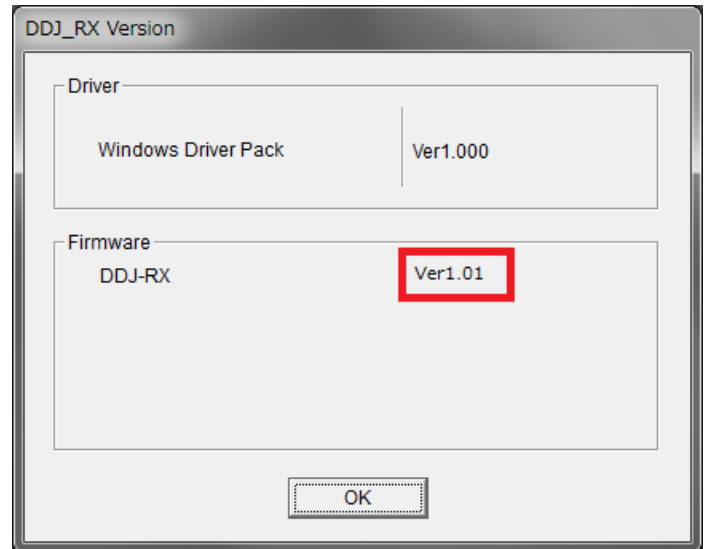

Click [All Programs] > [Pioneer] > [DDJ_RX] > [DDJ_RX Version Display Utility] from the Windows [Start] menu.

For Windows 8 / 8.1

From [Apps view], click [Pioneer] > [DDJ_RX Version Display Utility].

For Windows 10

Click [All apps] > [Pioneer] > [DDJ_RX Version Display Utility] after left clicking the Windows start button.

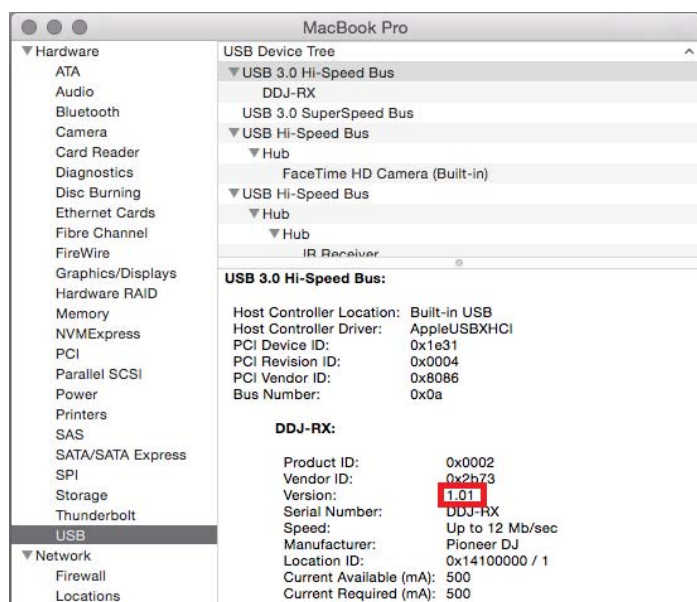

For Mac OS X

Open the Apple menu while pressing the option key, then select “System Profiler” or “System Information.”

Select the [USB] from the [Hardware] to display the name of the controller. Select the controller to display the firmware version.
