

DJ Controller

Firmware Update Guide

Read Before Use (Important)

- Be sure to follow the procedure in this guide to update the firmware.
- DO NOT disconnect the USB cable until updating is completed.
- If you should have any questions, please contact the Pioneer Customer Support Center of your country.

Reference information

This updater has been verified to operate on the operating systems below;

- Windows : Windows[®] 8/Windows[®] 7
- Mac OS X : 10.8/10.7/10.6
- Approximately 2 minute is required for updating.

What you need for Updating

-Update file for DDJ-SP1

When the downloaded zip file is unzipped, the update file appears. Place the update file on the desktop.

DDJ-SP1_V101.jar

-A computer where Java has been installed

If Java has not been installed, please download the Java Runtime Environment (JRE) at: <u>http://java.com</u> and install it on your computer.

Updating Procedures

Note: Close all applications on your computer before running this updating procedure.

1) Connect the above prepared computer to DDJ-SP1 via the USB cable included with the product while pressing both the effect parameter 1 and [TAP] buttons on the right side.

2) Make sure that the LEDs of the [SYNC] button and the [AUTO LOOP] knob on the both sides of the units flash before releasing your finger from these buttons.

3) When the update file for DDJ-SP1 (DDJ-SP1_Vxxx.jar) is activated, the following dialogue is displayed. Click the [Start] button.

000	Updater Program
Updates the versi	on of your DDJ-SP1 firmware.
