

## **Firmware for CDJ-2000 – CHANGE HISTORY**

### **Ver.4.33 (17 February, 2015 Update)**

- ✓ Fixed an issue where tracks in some folders in a 2TB HDD were not displayed when browsing the folder.
- ✓ Fixed an issue where a WAVE file, whose header is incompatible, cannot be loaded to a deck, but the [Loading..] sign is shown continuously.
- ✓ Fixed some issues in the Needle Search function.
- ✓ Display [KEY] instead of [GENRE] when browsing in [USB].

### **Ver.4.32 (1 April, 2014 Update)**

- ✓ Add a new function (analyzing a part of MP3/AIFF Tags) to support KUVO service.  
This update is only for using KUVO.

### **Ver.4.30 (2 December, 2013 Update)**

- ✓ Supports "KUVO".

### **Ver.4.20 (16 October, 2012 Update)**

- ✓ When accessing music libraries connected to a CDJ-2000 or CDJ-900 over LAN from a CDJ-2000NXS, the data required for the following features to work on the CDJ-2000NXS is now transferred.
  - WAVEFORM ZOOM
  - KEY indicators
  - ACTIVE LOOP
  - HOT CUE AUTO LOAD
  - MY SETTINGS SAVE/LOAD

### **Ver.4.11 (5 July, 2012 Update)**

- ✓ Fixed an issue that a particular USB3.0 does not work properly. The transfer rate for a USB3.0 device is the same as USB2.0.
- ✓ Fixed an issue that static noise was occasionally generated with a particular MP3 file.

#### **Ver.4.10 (16 January, 2012 Update)**

- ✓ Improved sound quality and stability when playing with MASTER TEMPO on.
- ✓ Fixed a problem that may occur when multiple CUE or HOT CUE points are set simultaneously.

#### **Ver.4.05 (13 September, 2011 Update)**

- ✓ Bug Fix - The loop sound would pose 1 frame loop by specific operation.
- ✓ Bug Fix - It rarely misaligned the beat grid about 50msec on the sound with MASTER TEMPO.
- ✓ Bug Fix - Click noise generated on the sound for the specific MP3 file.

#### **Ver.4.04 (1 June, 2011 Update)**

- ✓ Bug Fix - When using certain types of HDD that have a fixed long wake time from sleep mode, the player would stop the playback (E-8302 PLAYER ERROR) when trying to access it across the PRO DJ LINK.
- ✓ - Bug Fix - QUANTIZED BEAT LOOPS would pose 1 frame loop when using both the HOT CUE function while changing the BEAT LOOP length using the LOOP CUTTER or NEEDLE SEARCH STRIP.

#### **Ver.4.01 (31 March, 2011 Update)**

- ✓ Bug Fix -Loading time become longer from Ver.3.20 to Ver.4.00 when browsing from PLAYLIST. It occurred when PLAYLIST has many tracks.
- ✓ Bug Fix - Fader Start does not work correctly in some case.
- ✓ Bug Fix - After adjusting LOOP OUT setting by JOG Control,it was occasionally not possible to use OUT ADJUST mode.

#### **Ver.4.00 (17 February, 2011 Update)**

- ✓ A new "QUANTIZED BEAT LOOP" function to increase the accuracy of loop performance.
- ✓ Expanded Pro DJ Link(LAN Link) function.  
The new "UTILITY DUPLICATION" function allows instantaneous copying of player settings.  
Support for the output of song BPM information to the "DJM-900nexus" DJ mixer.

- ✓ Improved usability for the TAG LIST function to save them as playlists in the "rekordbox".
- ✓ The opening movie when powered on is adjusted to show the logo of "rekordbox".
- ✓ Solved the problem in USB3.0 media compatible with USB2.0. Transfer rate is same as USB2.0(480Mbps) when you use USB3.0media.
- ✓ When the media which are not analyzed by rekordbox were used, I displayed the cautions sentence on LCD.
- ✓ The [UNLOCK/LOCK] now works with [PC CONTROL] mode. When the position is changed to [LOCK] while using PC applications such as Scratch Live and Traktor, it's not possible to load a track from other media (USB Device, SD Card, rekordbox), which avoids accidentally stopping PC Control.
- ✓ Improved Sound Quality with Master Tempo.
- ✓ Fixed a bug where playback stopped if a loop was created across the whole CD in some case.
- ✓ Bug Fix - Noise generates in LOOP playback of specific CD.

### **Ver.3.20 (30 November, 2010 Update)**

- ✓ Enhancement - The Media Select Buttons (DISC, USB, LINK, etc.) will now blink when a track is loaded to clearly indicate the Media source.
- ✓ Bug Fix - A rare problem accessing Media Devices (USB, SD-Card.) has been resolved.
- ✓ Bug Fix - An error occurred after long play times which caused audio interruptions.
- ✓ A detailed code was added to error code "E8302".The analysis power of the market complaint goes up by adding this mechanism.

### **Ver.3.10 (12 July, 2010 Update)**

- ✓ Enhanced the HID connectivity with DJ software enables the CDJ to display the following information from DJ software on displays.
  - Browsing music files and playlists (crates)
  - Cue/Loop Point
  - WAVEFORM
  - Album Artwork
- ✓ In order to display the information above [HID SETTING] has been added to the UTILITY menu. If you are using Serato Scratch Live Ver.2.1 (released in July, 2010), select [ADVANCED] from [HID

SETTING]. Otherwise, select [STANDARD].

- ✓ An extended 8beat Auto loop is now available by holding the 4beat Auto loop button for more than 1 second.
- ✓ Able to show the tenth's place of BPM to one decimal place.
- ✓ Jog illumination starts blinking and the "PLAYING ADDRESS" display is inversed when the remaining play time of a track from the USB and SD storage device, or CD is less than 30sec.
- ✓ Factory default of QUANTIZE changed from OFF to ON.
- ✓ The color of the Jog illumination is reverted from red to white when you using DJ software.
- ✓ Antiglitch LOOP smoothing feature has been added to adjust the sound output when the volume of a LOOP start and end point do not match.
- ✓ Playback response times have been improved when using "HOT CUE REC", "REAL TIME CUE IN" or "4-BEAT LOOP" after "SEARCH" or "SCAN".
- ✓ Bug Fix / not able to set a loop when the track is less than 2sec.
- ✓ The brightness of the buttons around the display have been dimmed to improve visibility.  
(BROWSE, TAGLIST, INFO, MENU, LINK, USB, DISC, SD)
- ✓ Improved TEMPO slider operation and stability.

### **Ver. 3.00 (18 March, 2010 Update)**

- ✓ Expanded Pro DJ Link(LAN Link) function.  
Added 'rekordbox link' & 'rekordbox on-line export' - drag & drop (connected via lan cable).  
Added a link capability for DJM-2000.
- ✓ Improved Quantize precision to have consistency of CUE point and loop point between rekordbox and CDJ players.
- ✓ Added DJ comments to new playlist screen GUI & selection in UTILITY menu.
- ✓ History registering time changed from 45 seconds to 60 seconds & add colour indication
- ✓ Scroll speed on LCD - changed from 1x to 2x
- ✓ Improved search mode - Deleting back tick and adding apostrophe for search mode.
- ✓ Supported 24bit USB Audio for MAC - No support for Windows ASIO driver (You need the driver software when you use DJ software by Windows PC. The driver software will be opened in our web site. If you use it by MAC, please use MAC OS standard

driver software)

- ✓ Version Number - Version number will be displayed after power on.
- ✓ Additional caution display - Caution will be displayed after link with Ver.2.0x CDJ.
- ✓ Improved LCD flicker issue.
- ✓ Year browse mode bug fix - Fix file number limitation (61 files) in YEAR browse mode
- ✓ Change a color of track that the track has been played longer than 60 sec.
- ✓ Recording bug fix, recording stops in lead out, when you record (digital output) CD play by digital recorder.

### **Ver. 2.03 (28 January, 2010 Update)**

- ✓ Changed tempo slider's BPM shift to the same as CDJ-1000MK3's shift.

### **Ver.2.02 (18 December, 2009 Update)**

- ✓ Enhances play ability and stability
- ✓ Enhances stability of link function
- ✓ Performance improvement
