

Firmware for CDJ-400 – CHANGE HISTORY

Ver.1.33 (1 June, 2011 Update)

- ✓ Bug Fix - it wasn't possible to set CUE point in a top part of track, when playback the MP3 file.

Ver.1.30 (2 September, 2011 Update)

- ✓ The USB memory device detection time has been improved.
The time from which the USB memory device is inserted until tracks can be selected has been improved.
- ✓ The reliability when a USB hub (USB 2.0-compatible) is inserted between the PC and CDJ-400 has been improved.
Update if using your CDJ-400 connected to a PC application (Pioneer DJS, Serato Scratch LIVE, etc.).

Ver.1.20 (31 March, 2008 Update)

- ✓ During playback of MP3 loops some noise may have been heard.
This problem has been resolved.

Ver.1.12 (7 March, 2008 Update)

- ✓ Added support for DJ Software Application (*1) control.
- ✓ If you wish to use the CDJ-400 in conjunction with DJ Software Application (*1) please update your CDJ-400.

*1: For the customers using PIONEER's DJ software "DJS"

Update the DJS to Version 1.500 or later before using it with your CDJ-400.
