

Re-set the MIDI settings on Mac

1. Connect DJ equipment to your computer and turn the power on.
2. Open [Finder] and select [Applications] from [Go] on the menu bar.
3. Run [Audio MIDI Setup] in the [Utilities] folder.
4. Ensure that [Audio MIDI Setup] is shown on the menu bar. Then, select [Show MIDI Window] ([Show MIDI Studio] in OS X 10.10/10.11) from [Window].

5. [MIDI Studio] window opens up.
6. Re-set the Change Configuration drop down from 'Default' to 'New Configuration.'
