

Serato DJ Intro Install Guide

Please follow the instruction below to download and install Serato DJ Intro.

[Preparation]

You need an internet connection to download the software.

Make sure to log on your computer with the administrator account because administrator rights are required when installing the software.

[Minimum operating environment]

Windows	Windows XP (SP3 or better,32Bit) Intel® Pentium® 4 mobile 2GHz or Windows Vista/Windows7 (SP1 or better.32/64Bit) Intel® Core Duo 1.6GHz 1GB or more of RAM
Mac	Mac OS X v10.5.8 or better Intel® processor platform 1.6GHz or 1GB or more of RAM
Display resolution	Resolution of 1024 x 768 or greater

- * Full functionality is not guaranteed on all computers, even those meeting the operating environment requirements described above.
- * Even with the required memory indicated for the operating environment above, lack of memory due to resident programs, the number of services, etc., could prevent the software from offering optimal functionality and performance. In such cases, free up sufficient memory. We recommend installing additional memory for stable operation.
- * Depending on the computer's power-saving settings, etc., the CPU and hard disk may not provide sufficient processing capabilities. For notebook computers in particular, make sure the computer is in the proper conditions to provide constant high performance (for example by keeping the AC power connected).
- * Note that problems may arise with the functionality depending on other software running on your computer.
- * Operations are not guaranteed with AMD brand CPUs.
