# DDJ-ERGO

**“Serato DJ”  
Setup Guide**

# 1. Before start (Important)

## How to download and install Serato DJ is described in this Guide.

- Internet connection is required to download the software. Be sure to log in with the computer administrator's account to install Serato DJ.
- Windows users need an exclusive ASIO driver. Please follow the Operating Instructions of DDJ-ERGO to install the ASIO driver software included with DDJ-ERGO in advance (\*Mac OS X users do not have to install this driver software).

### Note:

- "Serato DJ" is a product of Serato.  
In principle, Pioneer is not in the position of answering any inquiries on the usage of the software itself. Please access the following URL to obtain the manual of Serato DJ.  
<http://serato.com/dj/downloads>
- Please ensure that the Master and Headphone volume knobs are rotated counterclockwise to the minimum before turning on the power of DDJ-ERGO.

### Limited Fuctionalities:

- Pulse Control function is not available.
- This software does not run on Windows® XP, Windows Vista® or Mac OS 10.5.

# 2. Minimum operating environment

These are simply the minimum requirements to run Serato DJ. For best performance and for use in professional situations we recommend you use a higher spec computer, preferably with an Intel processor.

	Mac	Windows
Operating System	Mac OS X 10.6.8 +	Windows® 7
Processor	32 bit: Intel® 2.0 GHz Core 2 Duo	32 bit: Intel® 2.0 GHz Core 2 Duo
	64 bit: Intel® 2.4 GHz Core 2 Duo	64 bit: Intel® 2.4 GHz Core 2 Duo
RAM	32 bit: 1 GB	32 bit: 2 GB
	64 bit: 4 GB	64 bit: 4 GB
	Note: If you have a large library, you will benefit from having more RAM.	
Screen Resolution	1280 x 720	
USB	USB 2.0	

### Note:

- The above operation is not guaranteed on all computers, even if all the required operating environment conditions indicated here are fulfilled.
- Even with the required memory indicated in the above operating environment, lack of memory due to resident programs, the number of services, etc., could prevent the software from offering optimal functionality and performance. In such cases, free up sufficient memory. We recommend installing additional memory for stable operation.
- Depending on the computer's power-saving settings, etc., the CPU and hard disc may not provide sufficient processing capabilities. For laptop computers in particular, make sure the computer is in the proper conditions to provide constant high performance (for example by keeping the AC power connected) when using Serato DJ.
- Note that problems may arise with the functionality depending on other software running on your computer.
- Operations are not guaranteed with AMD brand CPUs.
