djay PRO Connection Guide

Introduction

The CDJ-3000X/CDJ-3000/CDJ-2000NXS2 is equipped with an interface that enables high-precision control for djay Pro software manufactured by Algoriddim GmbH. Connecting these products to djay PRO provides control of the application without using a control CD.

This connection guide explains the basic operations when the products are connected to djay PRO. Please see the djay PRO manual for further details on how to use djay PRO.

Connecting to djay PRO

Preparations

- To connect to djay PRO, update the firmware of your multi player to the latest version.
Please see our support page (alphatheta.com/support/) for details of firmware upgrades.
- Update djay PRO to the latest version. Please see the Algoriddim website (algoriddim.com) for details on system requirements.

Connection Procedures

There are two ways to connect multi players to your computer.

1. Using multiplayers as audio interface

Connect the multi player (or multi players*1, if multiple players are to be connected) to your computer using a USB cable per multi player.

*1. Up to 4 multi players can be connected to djay PRO.

2. Using equipment supporting djay PRO (mixer, etc.) as an audio interface

Connect multi players to your computer using a USB cable per multi player*1.

Connect the equipment supporting djay PRO*2 (mixer, etc.) to your computer using a USB cable.

*1. Up to 4 multi players can be connected to control djay PRO.

*2. For equipment supporting djay PRO, please see the Algoriddim website (algoriddim.com).

Using the multi players as djay PRO Controllers

Turn on the power of all the units once the connections have been made. Then, follow the instructions below to set up each multi player.

1 **CDJ-3000X:**

Press the [SOURCE] button on the multi player and then select [SOFTWARE CONTROL (CDJ)]. Press the rotary selector to fix it. The multi player is now recognized by djay PRO.

CDJ-3000:

Press the [SOURCE] button on the multi player and then select [CONTROL MODE (CDJ)]. Press the rotary selector to fix it. The multi player is now recognized by djay PRO.

CDJ-2000NXS2:

Press the [LINK] button on the multi player and then select [USB MIDI] for the [CONTROL MODE]. Press the rotary selector to fix it. The multi player is now recognized by the djay PRO.

2 Turn the rotary selector to select the deck to control (1 to 4). Press the rotary selector to fix it.

The multi player can now control djay PRO.

Please see the djay PRO manual for further details on how to use djay PRO.
